## Section A: Learning outcomes of the assessments

This assessment addresses the following four learning outcomes:

| LO | Learning Outcome |
|---|---|
| **LO1** | Define a coherent strategic direction: vision, mission, goals, and objectives grounded in the company's specific situation. |
| **LO2** | Analyse a firm's internal capabilities and external environment to identify sources of competitive advantage, threats, and strategic possibilities. |
| **LO3** | Evaluate strategic options and make reasoned choices in complex, multi-horizon competitive environments. |
| **LO4** | Assess strategic analysis and translate findings into clear, actionable recommendations. |

## Section B: Introduction

This summative assessment for **MN7002NI International Business Strategy with Simulation** is a Group Presentation. Along with the presentation file, a copy of the individual contribution log should be submitted (template in Section G of this document), which needs to be agreed upon by all group members, and an individual reflection from each member. Any submission without this contribution log may be considered invalid and may not be marked. One of the group members should submit their group presentation PDF file through the My second teacher (MST) platform. A total of 100 marks are available for this assessment which represents 30% of the total marks for the module.

**About the Assessment (Case Study Analysis):**

This case follows **Mobilé Inc.**, a US smartphone manufacturer competing across the US, Europe, and Asia. Following a 2025 DOJ intervention that ended industry price coordination, the company must simultaneously manage its declining 4G revenue base, launch a 5G product it does not yet have, and begin AI-device R&D , all without breaching a USD 90M cash reserve floor.

Students are required to complete four tasks:

Task 1 asks for a coherent strategic direction: a vision, mission, goals, and SMART objectives specific to Mobilé Inc.'s three-wave situation.

Task 2 requires an internal and external analysis using appropriate frameworks to identify the company's capabilities, competitive gaps, and the forces shaping its strategic options.

Task 3 synthesises those findings into a SWOT where every point is evidenced and carries a clear strategic implication.

Task 4 calls for a specific, justified recommendation on how Mobilé Inc. should prioritise and compete across its 4G, 5G, and AI-device waves simultaneously.

Lastly, this should be followed by an **Individual Task-** A reflection report of **no less than 700 words** must be submitted by each member of the group highlighting their learning journey through the case analysis.

**About the Group presentation:**

The group presentation is intended to be 15 minutes with a further 5 minutes for questions. All group members must contribute to delivering the presentation. This component will be assessed in the form of a 20-minute group presentation and individual contribution log.

Each member of the group will receive the same mark unless:

- during the presentation, an individual makes a particularly weak contribution to delivery.
- no later than 3 days before the presentation, group members raise with the module leader the issue of an individual not meeting their commitments.

The University takes academic misconduct very seriously and seeks at all times to rigorously protect its academic standards. Plagiarism, collusion, and other forms of cheating constitute academic misconduct, for which there is an explicit range of graduated penalties depending on the particular type of academic misconduct. The penalties that can be applied if academic misconduct is substantiated range from a reprimand to expulsion in very serious cases and for repeated instances of misconduct.

Students may use AI tools as part of their research and preparation process. However, do not use it to generate your analysis or write your conclusions. The case study in this assessment is a specific detailed scenario, hence generic answers not relevant to the case study will not be rewarded. The Q&A session exists precisely to assess whether your group genuinely owns and understands the strategic argument you are presenting. If you cannot defend, extend, or adapt your recommendation under questioning, that will be reflected in your mark. The most valuable thing you can produce in this assessment is a strategic argument that is specific, coherent, and unmistakably yours.

**Section C: Forming Group**

a) Groups should ideally consist of **5 students**. Due to class size constraints, **2 groups may consist of 4 students.**You should agree on key roles for the presentation and must contribute to the presentation. Questions may be directed to **any team member at random**, so all members must have a **complete understanding of the presentation**. It is important that you develop into a high performing team, which requires investment of time and commitment.
b) It is important that you set up the means to collaborate as a group and it is vital that you rehearse delivering your presentation.

**Section D: Presentation Structure**

For this presentation, the submission slide limit is 30 slides including the title page, appendix-Individual Contribution log and references slide(s) if any. You must comply with the slide count limit. You may submit LESS than 30 slides but not more. The names of all group members and their student numbers should be on the title page of the presentation. All your references must have correct citations in the list of references using the **Harvard Referencing Format**. Reading a script from **phones, tablets, or other devices during the presentation is not allowed.**

You should structure your presentation as follows topics:

- Title page (one slide included presentation title & group members list including student IDs)
- Presentation agenda (one slide)
- Executive Summary (one slide)
- The Body (Task 1-Task 4)
- References (one slide)
- Appendix - Individual Contribution Log

**Section E: Assessment submission**

The deadline to submit the assessment is 10th April 2026, EOD.

Please note- **all the submissions must be converted to the PDF format.**

**Section F: Marking Criteria: How will you be evaluated?**

### Assessment Structure

| **Parameter** | **Detail** |
|---|---|
| **Assessment Type** | Group Presentation in a PPT Deck submitted in a PDF Format |
| **Group Size** | 5 students per group (with the exception of 4 students in 2 groups) |
| **Presentation** | 15 minutes + 5 minutes Q&A |
| **Individual Contribution Log** | Record of Individual Contribution in the shared template to be filled and presented as part of annexure in the power point slide. |

| | |
|---|---|
| **Individual Reflection of the Strategic Analysis** | A 700 words account of the learning journey to be submitted by each member of the group |

### Marking Criteria by Task

The assignment is marked out of 100. The following table shows the mark allocation and the approach required for each section. In the next section you will find the general Level 7 marking scheme.

| **Task** | **Marks** | **What Is Being Assessed** |
|---|---|---|
| 1.Executive Summary | 5 | The executive summary should distil all four tasks into a single cohesive slide that a board member could read independently. It must capture: (a) the core strategic direction for Mobilé Inc. i.e. the essence of the vision and mission in the context of the three-wave structure; (b) the most critical findings from the internal and external analysis, including key capability gaps and competitive threats identified; (c) the synthesised SWOT position and its primary strategic implication; and (d) the recommended strategic choice, including how Mobilé Inc. proposes to manage its 4G, 5G, and AI-device waves simultaneously. Marks are awarded for precision, selectivity, and executive clarity and not for length or exhaustive listing. A strong executive summary makes the strategic argument in a few clear, well-chosen statements. It is not a repetition of task-by-task outputs; it is the confident conclusion that a senior decision-maker needs to act. |
| 2.Strategy Process | 15 | This task assesses the quality, coherence, and case-specificity of the strategic direction developed for Mobilé Inc. in its specific 2025 context. Marks are awarded across four interconnected elements: (a) Vision: Does it reflect the multi-horizon nature of Mobilé Inc.'s three-wave structure? Is it ambitious yet grounded in the company's actual competitive situation post-DOJ intervention? (b) Mission: Does it articulate what Mobilé Inc. does, for whom, and in which markets in a way that is specific to its global, multi-market presence and technology portfolio, rather than applicable to any generic technology company? (c) Strategic Goals: Are they substantively linked to the three waves? Do they address the balance between defending the 4G revenue base, capturing first-mover advantage in 5G brand positioning, and committing to AI-device R&D before the window closes? (d) SMART Objectives: Are they genuinely |

| | | |
|---|---|---|
| | | specific with quantified targets traceable to case data, measurable, realistic within a defined planning horizon, and internally consistent across the goal hierarchy? Generic statements such as “to be the leading smartphone company globally” will receive minimal credit. Top marks require a strategic direction where every element reinforces the others and reflects a deliberate, considered stance on the central three-wave tension facing Mobilé Inc. (Mc Kinsey three horizon framework). |
| 3. Internal & External Analysis | 30 | This is the highest-weighted task and assesses the depth, accuracy, and case-specificity of the strategic analysis applied to Mobilé Inc. Marks are awarded across two dimensions: (a) Internal Analysis: Students should select and apply frameworks appropriate to diagnosing Mobilé Inc.’s internal capabilities and competitive position — for example, the Resource-Based View / VRIO framework, Value Chain Analysis. Analysis must go beyond listing generic resources. It should identify which specific capabilities (e.g. the Atlanta and Vietnam manufacturing network, the 4G cash generation engine, existing R&D infrastructure, management experience across three global markets) represent genuine sources of competitive advantage or strategic vulnerability and critically explain why in the context of the 2025 competitive environment. (b) External Analysis: Students should apply macro-environmental and industry structure frameworks (e.g. PESTLE, Porter’s Five Forces, Strategic Group, CSF) to map the forces reshaping Mobilé Inc.’s competitive landscape including the impact of the DOJ intervention ending tacit price coordination, 5G Sub-6GHz network coverage now exceeding 70% of urban populations in the USA, accelerating consumer appetite for AI-powered use cases, competitor R&D timelines for next-generation devices, and the structural dynamics of competing against three equally-sized international rivals. Framework justification is required: students must explain why each framework was selected and what specific insights it generates for Mobilé Inc.’s unique situation. Descriptive or template-filling application of frameworks without genuine case-specific interpretation will receive limited marks. High marks are reserved for analysis that produces actionable strategic insight rather than a completed checklist. |
| 4. SWOT Synthesis | 15 | The SWOT is assessed as a synthesis document, not a standalone analytical exercise. Each SWOT point must meet three tests: (a) Evidenced: every point must trace directly to findings already produced in Task 2 : no new information or unsupported claims should appear for the first time in the SWOT. (b) Case-specific: every point must be specific to |

| | | |
|---|---|---|
| | | Mobilé Inc.'s actual situation (for example, "No 5G handset launched despite Sub-6GHz coverage exceeding 70% of US urban populations" as aweakness (c) Strategically interpreted: each point should carry an explicit implication for strategic direction, i.e. what does this Strength, Weakness, Opportunity, or Threat mean for the choices Mobilé Inc. must make? The SWOT should also make internal-external connections visible; for example, linking a manufacturing capability strength to a 5G market opportunity, or connecting the 4G revenue dependence weakness to the competitive threat of post-DOJ price competition. Crucially, the SWOT must set up and be logically consistent with the strategic recommendation in Task 4. A SWOT that contradicts the subsequent recommendation, or that simply lists generic points, will impact the marking. |
| 4. Strategic Choice & Recommendation | 15 | This task assesses strategic judgement, analytical coherence, and executive communication. Marks are awarded across five dimensions: (a) Clarity of strategic choice: The recommendation must take a clear, unambiguous position on how Mobilé Inc. should compete, specifying the markets to prioritise (USA, Europe, Asia), the technology waves to invest in (4G management, 5G launch, AI-device R&D commitment), and the competitive posture to adopt (e.g. differentiation in premium 5G vs. cost leadership in emerging market 4G). Vague or hedged recommendations will not receive high marks. (b) Three-wave coherence: The recommendation must explicitly address how Mobilé Inc. will manage all three waves simultaneously including how 4G revenues will be protected and deployed, whether 5G technology development will be in-house (building IP) or licensed (faster, costly), and what AI-device R&D investment is being committed now to avoid permanently forfeiting technology leadership. (c) Analytical consistency: The recommendation must follow from and be explicitly consistent with the strategic direction developed in Task 1 and the SWOT analysis in Tasks 2 and 3. Strategic choices that contradict the prior analysis without clear justification will affect the marking of the student. (d) Trade-off honesty: Strong responses acknowledge real constraints such as including the USD 90M minimum cash reserve requirement, the simultaneous capital demands of 5G launch and AI-device R&D etc. Executive communication: The recommendation should read as a clear, specific, and actionable strategic brief and not a summary of the analysis that preceded it. Make the decision, justify it, and explain what it requires of the organisation. |

| | | |
|---|---|---|
| 5. Structure of the Presentation And Originality of the Report | 10 | This component assesses the professional quality of the presentation delivery and the originality of the analytical thinking. Marks are awarded across four dimensions: (a) Professional presentation structure: slides are clearly organised, each task is visibly and logically addressed, visual aids enhance and support the verbal content rather than duplicate it, and the narrative flows coherently from the executive summary through to the final recommendation as would be expected in a genuine board-level strategy briefing on Mobilé Inc. (b) Delivery quality: presenters demonstrate confidence, clarity, and command of their material. Reading directly from slides, phones, tablets, or other devices is not permitted, and will result in a deduction from this component. (c) Q&A performance: all team members must demonstrate a complete and independent understanding of the group's analysis and recommendations. Questions may be directed to any member at random; responses should be precise, evidence-based, and show the ability to defend, extend, or adapt the group's strategic position under challenge. (d) Originality: the analysis and recommendations should demonstrate genuine independent thinking about Mobilé Inc.'s specific strategic situation going beyond reproducing standard textbook templates to produce insight that is specific, justified, and reflects real strategic judgement about the three-wave challenge facing the company in 2025. |
| 6. Individual Reflection | 10 | A detailed account of individual contributions, lessons learnt, applications of classroom studies in the analysis, evidence of independent learning, etc. |

**Section G: Individual Contribution Log**

The individual contribution log is both a planning tool and a record of individual contribution to the presentation and will be part of the PowerPoint Template.

| **Activity (these are the activities you decide are needed to complete the assessment)** | **Intended contribution of each individual group member** | **Actual contribution made by each individual group member** |
|---|---|---|
| Planning and work timeline | | |
| Research and Information Review | | |
| Strategic Direction Development (Task 1) | | |
| Internal and External Analysis (Task 2) | | |
| SWOT Synthesis (Task 3) | | |
| Strategic Recommendation (Task 4) | | |
| Report structuring and writing | | |
| Presentation Design | | |
| Presentation preparation and rehearsal | | |

**Section H: Assessment Grade Description**

| Mark | Achievement level | |
|---|---|---|
| **Distinction** | 85-100 % | a) Outstanding work demonstrating an exceptional command of international business strategy applied specifically and insightfully to the Mobilé Inc. case. The three-wave structure (4G, 5G, and AI-device) is fully understood and integrated throughout every task. Exceptional ability to analyse, synthesise, and evaluate across multiple analytical frameworks with genuine strategic insight.<br>b) Strategic recommendations for Mobilé Inc. are exceptional: fully specific, clearly differentiated by market and technology wave, addressing trade-offs with honesty, and grounded in case evidence throughout. Solutions reflect strong ethical appreciation and a sophisticated understanding of corporate responsibility in a global, multi-market context.<br>c) The strategic direction (Task 1) is outstandingly coherent: vision, mission, goals, and SMART objectives interlock seamlessly and reflect a deliberate, well-considered stance on the three-wave resource allocation challenge. Evidence of extensive reading and genuine independent thought beyond course material, including relevant academic and industry sources.<br>d) Writing that is fluent, clear, concise and grammatically correct. Tables, diagrams and other figures are highly effective in supporting the text and presenting key messages.<br>e) A submission that is focused and relevant to the task, comprehensive, accurate, and presented in a very professional manner. Excellent use of digital technology.<br>f) Comprehensive, error free citations and reference list. |
| | 70-84 % | a) Excellent work demonstrating strong knowledge of international business strategy concepts and frameworks applied effectively to the Mobilé Inc. case. The three-wave structure is well understood and reflected across most tasks. Good analysis, synthesis, and evaluation, with insights that are specific to the company's competitive situation rather than generic.<br>b) Strategic recommendations are clear and well-justified, addressing how Mobilé Inc. should manage the 4G, 5G, and AI-device waves with attention to resource constraints, risk, and value creation.<br>c) Evidence of substantial reading, study and sense making beyond the course content and of independent thought.<br>d) Writing is fluent, clear, concise and grammatical. Strong use of tables, diagrams and other figures in supporting the text and presenting key messages.<br>g) A submission that is relevant to the task, comprehensive, accurate, and presented in a well-structured and organised manner. Good use of digital technology.<br>h) Comprehensive citations, and correct use of the Harvard style in the reference list. |

| | | |
|---|---|---|
| **Merit** | 60-69 % | a) Good work showing solid knowledge of relevant strategic management concepts applied to the Mobilé Inc. case. The three-wave structure is identified and addressed, though the treatment may lack full depth or integration across all tasks. Some meaningful analysis, synthesis, and evaluation are present.<br>b) Reference made to relevant course material with evidence of some reading, study and sense making beyond the course content and some independent thought.<br>c) Writing is clear, mostly concise, and has few grammatical errors. Good use of tables, diagrams and other figures in supporting the text and presenting key messages.<br>d) A submission that is relevant to the task though less than completely comprehensive, is mostly accurate, and is well presented. Mostly good use of digital technology.<br>e) Effective use of citations and a complete reference list. Some minor errors in use of the Harvard style |
| **Pass** | 50-59 % | a) Adequate work showing reasonable understanding of relevant strategic frameworks applied to the Mobilé Inc. case. The core features of the case (the three-wave structure, the DOJ intervention, the 5G gap) are acknowledged, but analysis is limited in depth and case-specificity. Tasks may be addressed in isolation rather than as an integrated strategy. Limited analysis, synthesis, and evaluation.<br>b) Little or no evidence of reading, study and sense making beyond the course content and little or no independent thought.<br>c) Writing is less than clear, is not concise and has some grammatical errors. Some use of tables, diagrams and other figures in supporting the text and presenting key messages.<br>d) A submission that is mostly relevant to the task and reasonably accurate, but not very comprehensive and with some errors and shortcomings of presentation, structure and organisation. Basic use of digital technology in the creation and presentation of the work.<br>e) Adequate citation and reference list. Some errors in use of the Harvard style and some missing citations. |
| **Fail** | 40-49 % | a) A weak piece of work showing only limited engagement with the Mobilé Inc. case and the strategic management concepts required to analyse it. Analysis is mainly descriptive and generic, with substantial errors, omissions, or misapplication of frameworks. The three-wave structure and its implications for strategic choice are not meaningfully addressed. Little or no independent thought or analytical evaluation.<br>b) Evidence of a range of sources but with reliance on inappropriate sources without critical evaluation.<br>c) Writing is not clear and has frequent grammatical errors.<br>d) Much of the submission is not relevant to the task. Lacking professionalism, weak presentation, poorly structured and organised. Ineffective use of digital technology in the creation of the work.<br>e) Limited citation and reference list. |
| | 30-39 % | A poor piece of work with extensive errors and omissions, badly written and ungrammatical. A little relevant material but poorly presented with little evidence of understanding. Weak use of digital technology. |

| | | |
|---|---|---|
| | 0-29% | A very poor piece of work lacking in understanding and with serious errors and omissions but with evidence of some knowledge vaguely relevant to the question. |
